NO. 3

## LAND! LAND!

### 5,000 acres of beautiful black loam land, situated in SOUTH NUECES COUNTY, TEXAS,

within 2 1-2 miles of the town of Kingsville. This tract of land is a part of the King Ranch lands, and the title is perfect, all deeds come direct from Mrs. H. M. King. This entire tract is underlaid with artesian water, which is secured at a depth of from 700 to 800 feet and affords sufficient water for irrigation of as much as 50 to 80 acres from one well.

The closest of this land is within 2 1-2 miles of the new \$30,000 High School building in the town of Kingsville, and the furthest of this land is within 3 miles of the railroad.

This land will produce from half to a bale of cotton to the acre each year. Cotton is the staple summer crop, while onions and cabbage can be grown on the same land through the winter months.

This is one of the best land propositions now on the market in South Texas. I expect to colonize this land strictly with German and Bohemian farmers, and with the extensive advertising campaign that I now have on, I believe every foot of this land will be sold by January 1, 1910.

Write me for further information regarding prices, terms, rate of interest, etc.

I will gladly furnish you with literature and maps showing my proposition up in detail.

I SOLICIT CORRESPONDENCE.

## Cotton Near Hallettsville.

Hallettsville, Tex., August 18. —Most of the cotton is now open in this vicinity and the crop will be short. From 150 to 200 bales are now being marketed daily, and if the weather will continue hot and dry, very little damage will be done by the boll weevil. This is the hottest day of the year here, the thermometer registering as high as 99 degrees in the shade, and there is very little breeze.
